SUMMARY

Creative Technologist experienced in designing and building digital platforms and interactive systems across web, physical and immersive environments. My work combines interaction design, storytelling and creative coding to create engaging digital experiences. Comfortable working across the full process from prototyping and experimentation through to implementation, with a strong focus on craft, performance and technical problem-solving.

EXPERIENCE

NV Access **2025-present**
UX/UI Designer London, United Kingdom

- Product: NVDA (Non-Visual Desktop Access)
  - **Accessibility Engineering:** Defined consistent UI/UX behaviour across distributed codebases, improving front-end accessibility compliance and resolving interaction conflicts across multi-browser web environments, increasing assistive navigation reliability and consistency in assistive contexts.
  - **Technical Documentation & Git Collaboration:** Produced structured documentation, issue reports and
  - testing feedback within a Git-based workflow, supporting maintainable fixes and reducing regression risk.

George P. Johnson UK **2023-2024**
Creative Technologist London, United Kingdom
Global Experience Design & Delivery: Designed and delivered 27 international projects spanning digital platforms and immersive environments. Owned interaction design, user journey mapping and experience optimisation across global brand activations, worked with clients such as Cisco, IBM, Booking.com and Starbucks.

- Starbucks UAE
  - **Multi-Sensory Brand Storytelling:** Developed the project from the initial client pitch through to delivery, combining motion, graphics, scent and physical interaction into one multi-sensory experience. Achieved 83% visitor satisfaction and a 73% increase in brand understanding. Awarded Bronze Drum for Best Experiential.
- Cisco Netherlands
  - **Gamified Learning Experience:** Designed and implemented a gamified AR learning system, exploring innovative technology and interaction logics to improve engagement and knowledge delivery. Developed scalable component framework to ensure cross-platform consistency and smooth technical implementation.
  - **Platform Redesign:** Redesigned Cisco's internal CMS platform around content and publishing workflows. Restructured information architecture and reusable templates to improve discoverability and maintainability.
- GPJ Lab United Kingdom
  - **Spatial Computing:** Designed and built an XR application for Vision Pro using RealityKit, exploring spatial interaction, real-time rendering and embodied storytelling through responsive mixed-reality environments.
  - **Innovation R&D:** Experimented with Gen-AI, AR/VR and emerging technologies, actively translating technical capabilities into working demos, experimental interfaces and client-facing experiences.

EDUCATION

University of the Arts London **2021-2025**
Bachelor of Science in Creative Computing (First Class Honours) London, United Kingdom

SKILLS

- **Design:** Interaction Design, UX Design, Interactive Storytelling, Responsive Design, Accessibility, Prototyping
- **Creative Tech:** Creative Coding, Real-Time Graphics, Spatial Interaction, XR, Sensor Systems, Data Visualisation
- **Technical & AI:** JavaScript, Python, Node.js, HTML/CSS, WebGL, RealityKit, API Integration, Generative AI
- **Tools:** Figma, Adobe Creative Suite, TouchDesigner, Blender, Digital Fabrication, Git/GitHub, CMS Platforms
